September 2014
Absorption Report
Manhattan Apartments

SEPTEMBER 2014 HIGHLIGHTS

- The absorption rate for Manhattan apartments increased to 4.2 months in September, as inventory rose sharply.
- Upper Manhattan was the only market to have a lower absorption than during September 2013.
- The West Side continued to have Manhattan's lowest absorption rate, followed by Upper Manhattan.

DEFINITIONS

Listings: Number of active listings transmitted through the Real Estate Board of New York's listing service at the beginning of the month.

Absorption Rate: How many months it would take to sell all active listings in a given market. We calculate it by dividing the number of listings by the average number of closings over the prior 6 months. Historically, an absorption rate between 6-9 months indicates a balanced market.

MANHATTAN
